INFO **ABOUT ME**

If you are interested to know something about me then you can read the info below.

ABOUT ME

I'M

Alexey Chernishov aka «ft» & I'm graphic / media designer based in Ukraine, Kiev.

I specialize on creating & developing stylish logotypes and clean identities.

ABOUT ME

At the moment I work in design studio «ultistudio» in Kiev. Seriously engaged in graphic design since 2004, when I finally realized that this is what I really love.

I'm having a passion for creating clean, modern identities, stylish & beautiful logotypes and illustrations. I'm constantly improving and developing my skills and abilities. I will not hide that I like to set goals and necessarily pursue them.

THIS SITE

Developed, designed and coded by myself, using valid xHTML | CSS.

Big thanks to Ariley Fleksay for «scrollto», Vexdex, Frujo and Zume for advice.

I CAN BE USEFUL

If you'll need clean & modern corporate identity, stylish & informative logotype, or redesign, I'll take your task with real pleasure and enthusiasm!

TECHNICAL SKILLS

I work with Adobe Photoshop, Adobe Illustrator and Adobe InDesign.

I'm focused on developing modern & functional identities and logotypes.

INTERESTS

I like music, both listening and creating. For me, music is one of the main and biggest sources of inspiration, currently I prefer Deep House, Funk,

Information

General Overview

I write, design, and sometimes make music. In 2001, I co-founded **Red Antenna**, an award-winning creative studio. I've also taught several courses in design at the Pratt Institute and Parsons School of Design. Currently, I'm working on a book about the American landscape called *The Aweful Making of an Optimist*. I also write about **Techno music**, take photographs of old factories, and try my best to be chivalrous.

Statistics

ASTUTE

NOT JUST A STUDIO

Design and technology make a pretty good pair. In fact, together, with ideas, they have a hand in just about everything. Light bulbs, telephones, airplanes. Assembly lines and payroll systems. Lower overheads, higher profit margins, and better customer service. The Internet.

It ain't a bad deal. Especially when it comes to business. And looks, for you, it's what this company does best.

This is not just a studio. It's Astuteo. With good taste and great technology, we design compelling visuals, user-friendly web sites, and custom web applications for organizations of all shapes and sizes. It's actually fortunate, isn't it, somebody's gotta do it.

Award-Winning Graphic Design

 Graphic design is the currency of power and success. From our own years experience in print design, logo design, web design and marketing, high-energy events, to a solid creative partner in every project, whether it's a re-invention of yourself, branding, web media, commerce, and entertainment, Astuteo brings an integrated perspective to the intersection of design and business.

Integrated Web Development

 Web design and web development are two disciplines. Different, yes, and often at odds, but when well-integrated, they are defined during the design process, and the final design and strategy are more than a part of the development. In essence, the designer is the developer, maximizing your site so it is as beautiful under the hood as it is on the surface. And that's pretty friggin' beautiful.

Hi, I'm James

I'm a web designer based in Sydney, Australia. I am passionate about design and visual expression is an important part of my life. I love the gamut of design that spans from fashion to hand coding semantic, standards compliant code.

Relatively new to the medium, I have worked with a number of large organisations including General Pants, Kruhi, VII beer and the South Sydney Rabbitohs.

When I'm not catching a healthy computer tan I can be found trying to get myself closer to a mountain to snowboard down.

Skills, passion, determination & a love for design

Skills

Primarily a web designer, I enjoy both sides of the craft that varies from creating purely visual designs to writing standards driven, semantic XHTML and CSS. Above all of this, strong visual communication is at it's heart.

- ✓ Standards driven, semantic XHTML & CSS
- ✓ Photoshop, Illustrator and Flash
- ✓ Video editing and visual effects (based

Clients

Working in an agency environment for a little over a year I have had the fortune to work with some interesting clients along with a challenging array of internal projects. Here's a short list of the types of clients & markets I've worked with:

- ✓ Fashion (Kruhi, General Pants)
- ✓ Corporate (Oil Search, Tesco)
- ✓ Sports and locals (Souths, City of Port Phillip)

Projects

Given the chance, I enjoy the challenge of working on variety of projects requiring differing skills and strategies. I like to work with a rigorous process to try to consistently represent and produce the goals of a project. Some examples include:

- ✓ Front end Web Design (Design & code)
- ✓ Flash design & animation
- ✓ Video projects (inc visual effects)

BE REMEMBERED.

That's all you want your communications to do. To strike a chord with your customers. To move something in others. The key is to get your brand's message to the right people, the right way, at the right time.

And that's what we do.

We communicate. Clearly. Concisely. Visually. We believe a message stands a much greater chance of being remembered if it has a soul. If it has a life. There's a fine line between art and business. That's the line we walk every day.

Care to take a stroll?

"Go Media went the extra mile and helped us not only create an awesome logo, but also a solid brand image."
